

**PERSONAL PROPERTY  
Tax Form 920-NT  
“NEW TAXPAYER RETURN”  
2002**

File this return in duplicate with your county auditor (within 90 days of starting business). **This return must be filed even though no tax is due.** No payment is required if the total tax due is less than \$2.00.

**If the return is received late, the assessor will add a penalty of one-half of the listed value normally exempted, to a maximum of \$5,000 listed value. Also, a penalty of up to 50% is added to the remaining taxable value.**

**NOTICE**

**Taxing District** – You must list your property in the taxing district where it is located and show the complete name of the taxing district. Taxing district names normally consist of a township, city or village and school district. Cities may have more than one school district. If you do not know your taxing district, check your real estate bill or contact your county auditor.

## Administration of the Personal Property Tax

Each county auditor places on their county's general tax list the values presented by each single county taxpayer as filed on the annual returns, and the inter-county values preliminarily assessed by the Tax Commissioner. A duplicate of this list is presented to the respective county treasurer for the preparation and mailing of tax bills, and the subsequent collections.

Preliminarily assessed values of general business personal property are determined by the taxpayer, based upon requirements of the Ohio Revised Code, Ohio Administrative Code, and the directives and guidelines prescribed by the Tax Commissioner. Businesses with taxable personal property in one Ohio county file a County return of Taxable Business Property, Form 920, in duplicate with the respective county auditor. Businesses with taxable personal property in more than one county file an Inter-County Return of Taxable Business Property, Form 945, with the Tax Commissioner.

Personal Property Tax collections are distributed by the county auditor to the local jurisdictions, e.g., county governments, municipalities, townships, school districts and special districts according to the allocated value times the total millage levied by each jurisdiction. Approximately 70% of the collected revenue is allocated to primary and secondary education.

In completing a Return of Taxable Business Property, you are required to disclose the valuation methods used for determining "true value" of your personal property. Disclosure of valuation methods used should not be construed as "prime facie" acceptance by the Tax Commissioner of their use.

The Tax Commissioner is also responsible for assessing all unreported personal property and auditing the preliminary assessments to determine that taxable property values are based upon "true value in money."

If you discover an error after filing a Return of Taxable Business Property, an Application for Final Assessment may be filed with the Tax Commissioner to initiate a review of the values assessed.

Common questions and answers are contained in the following pages of this booklet. If you need further assistance, please call or visit your local county auditor, or call or visit one of the Taxpayer Service Centers of the Ohio Department of Taxation.

# Instructions for New Taxpayer Return

Any person, partnership, corporation or association who engages in business in Ohio on or after January 1 of any year is a “new taxpayer” for that year. Whenever a taxpayer ceases business in Ohio, and in a subsequent year begins business in Ohio again, he is a new taxpayer for that year. The new taxpayer is liable for a property tax return in the year in which he commences business in Ohio. The total listed value is prorated based on the number of full months in business in Ohio in that first year.

**Filing Due Dates** – The new taxpayer return (920-NT) is to be filed with the county auditor within 90 days of first engaging in business in Ohio. An extension of time of up to 45 additional days may be requested from the county auditor by written application. This return (920-NT) is for the year in which the business commenced in Ohio, even if it is not required to be filed until the next calendar year.

**Late Filing** – If the return is not timely filed, the assessor will add a penalty of up to 50% of the taxable value plus loss of ½ of the \$10,000 exemption.

The next tax return required to be filed is for the calendar year following the year in which the business began. This return is due in the normal filing period of February 15 through April 30. All taxable property in this year’s return must be listed as of the close of business on December 31 of the preceding calendar year (the year engaged in business). Inventory is listed at the average of the month-end values for each of the months that the taxpayer was engaged in business in that year. Use the number of month-end values included as the divisor. Listed values in this year’s return may not be prorated.

**1st Day of Business** – The date of engaging in business has been generally defined as the day the business commences operations, which is not necessarily the day the business was organized or licensed in Ohio. In the case of a merchant, the day that the business opened for the purpose of selling merchandise would be the first day of business. In the case of a manufacturer, it would be the first day that production started. For other business activities, the first day of business would be the day that the intended business activity started.

**Listing Date** – For the new taxpayer return, the listing date is the first day of business in Ohio instead of December 31 or a fiscal year end. All taxable property, except inventory, owned on the first day of business must be listed, the true value is the taxpayer’s cost. Inventory must be listed at the average value for the remainder of the year. Estimate month-end values starting with the end of the month engaging in business and for each month-end throughout the remainder of the year. If additional locations will be opened later in the year, inventory for those locations must also be estimated for the new taxpayer return. The average value is the sum of the month-end values divided by the number of month-end values included. The estimated values reported may be amended at a later date, when actual month-end inventory values are known.

**Prorating** – The total listed value of the return is multiplied by a fraction which represents the portion of the year during which the taxpayer will be engaged in business in Ohio. The

numerator of the fraction is the number of full months from the date of engaging in business to December 31, the denominator is twelve. This is the value to which the tax rates are applied to determine the amount of tax owed.

**Acquisition of Existing Business** – When a new taxpayer has acquired an existing business and that business has filed a personal property tax return for the same year in which the new taxpayer acquires the business, taxes for property that was listed by the former owner need not be paid again by the new taxpayer. The new taxpayer must produce a copy of the return or assessment indicating that the same property has been listed or assessed for taxation for the same year. The amount of inventory which may be excluded is the lower of the average amount listed by the former owner in his return for the same year, or the amount transferred. Any property not listed in the former owner’s return and acquired prior to the new taxpayer’s first day of business must be listed. Average inventory in excess of the amount excludable must also be listed.

**Reorganization** – Frequently, an existing business that had been organized as a proprietorship or partnership will be reorganized as a corporation, or other changes in the business structure take place that result in the existence of a new entity. In these circumstances, the new owner or business entity is considered a new taxpayer and required to file a new return for the year in which the change took place. These new taxpayers are subject to the same reporting requirements as those beginning a new business. A copy of the return filed for the same year by the former entity should be included with the new taxpayer return.

**Alternate Listing Date** – Rule 5703-3-04, Ohio Administrative Code, provides for the use of listing dates other than December 31. Before a listing date other than December 31 may be used, the taxpayer must be engaged in business for at least twelve months prior to that listing date. In certain instances, where property may be excluded from taxation for a year, or taxed twice in a year, the Tax Commissioner may authorize or require an alternate listing date for a taxpayer to exclude or to report property involved in a change of ownership. These circumstances may affect the new taxpayer’s return when an entire business or facility is acquired.

## Listing and Valuing Personal Property

Personal Property is every tangible thing which is owned, except real property. Real Property is defined as land, growing crops, all buildings, structures, improvements and fixtures on the land.

Tangible personal property used in business in Ohio is taxed. This includes machinery and equipment, furniture and fixtures, small tools, supplies and inventory held for manufacture or resale.

**\$10,000 Exemption** – The first \$10,000 of listed value of taxable personal property owned by a taxpayer is exempt from taxation to the owner. The exemption is applied in the taxing district with the highest listed value. If that is less than \$10,000, the remaining amount is applied in the taxing district with the next highest value until either the \$10,000 exemption is exhausted or a net taxable value of zero is reached.

This exemption is not transferable to another taxpayer and cannot be carried forward or back to any other year. A taxpayer not having a personal property tax liability because of the \$10,000 exemption is by Ohio law required to file a personal property tax return. A return must be filed to enable reimbursement to the County by the State for taxes not paid due to the exemptions, and to substantiate the amount and location of the exemption claimed. **When a return is not timely filed, one-half of the allowable exemption is forfeited.**

**Exempt Property** – Includes property used in agriculture, pollution control facilities certified as exempt, energy conversion facilities certified exempt, patterns, jigs, dies and drawings not held for sale, construction in progress not capable of use, and registered motor vehicles and aircraft.

**Leased Property** – Must be listed by the owner, regardless of the terms of the lease. If the lessee is obligated to purchase the property, then he is deemed to be the owner, otherwise the lessor is deemed to be the owner. If you lease property to a public utility or an interexchange telecommunications company, contact the Department of Taxation, Property Tax Division, for instructions. Lessee's must list all tangible personal property held under lease on tax listing date on Tax Form 920, Ohio Balance Sheet, Exhibit C.

**Inventories** – Ohio law requires inventories of manufacturers and merchants to be listed on the average monthly basis. The average value is determined by dividing the sum of the month-end values in each taxing district by the number of months engaged in business in Ohio in that year., i.e., a merchant moving from taxing district "A" to taxing district "B" during the year would report the monthly values for each taxing district separately and divide the total of each by the number

of months in Ohio business. If monthly inventory records are not maintained, a gross profits computation may be used (Rule 5703-3-16).

The value of manufacturing inventory must include the costs of raw material, goods-in-process and finished goods. Goods-in-process and finished goods must include all factory burden and overhead costs attributable to the manufacturing facilities and process. Such costs include, but shall not be limited to, indirect labor, insurance, utilities, taxes, transportation, rents and leases, repairs and maintenance, depreciation and amortization (Rule 5703-3-27).

The value of merchandising inventory must include the costs to acquire the inventory, taxes and freight. Inventories carried at retail must be restated at cost. Consigned manufacturing or merchandising inventory must be listed by the owner, but inventory consigned to a merchant from outside Ohio must be listed by the merchant.

Supply inventories of a manufacturer must be listed in Schedule 3 on the average basis. All other supply inventories must be listed as of the listing date in Schedule 4. Inventories of taxpayers other than manufacturers and merchants must be listed as of listing date in Schedule 4. Such inventories include those of mines, quarries, laundries, dry cleaners, contractors, repair shops, garages, etc.

**Taxing Districts** – Property must be listed in the taxing district where it is located. Taxing district names normally consist of a township, city or village and school district. Cities may have more than one taxing district. If you do not know your taxing district, check your real estate bills or contact your county auditor.

## Sample Tax Return of a New Taxpayer

Queen's Specialty Shops, Inc., incorporated in Ohio on July 15, 2002. The shop is a small retail operation that specializes in the sale of original art and craft items. Although the business was incorporated in July, it was a month later when the company opened its doors for business the first day of business was August 13, 2002.

The furniture and fixtures consist of wall shelving, center display islands a desk and file cabinet in a small room at the rear of the shop. The inventory is purchased from a select group of local amateur artists.

The accounting records will be kept on an accrual basis. Inventory records reflect cost and will be accurately maintained to provide future month-end inventory values.

A new taxpayer return and balance sheet using an August 13, 2002 listing date are required to be filed within ninety

days of engaging in business, which in this example would be November 12, 2002. Month-end inventory values are estimated for August through December, and the total of all such values is divided by five to determine the average. The true value of all other property is its cost. All listed values are then prorated by the fraction of four-twelfths, since the taxpayer will be engaged in business for four full months in 2002. The completed tax return required to be filed by Queen's Specialty Shops, Inc. for 2002 follows.

While this return indicates that no tax is owed by the taxpayer because of the \$10,000 exemption, the return must be filed. The county and school district will be reimbursed for the amount of tangible property taxes not paid due to the \$10,000 exemption. A return must be filed so that the county auditor may certify to the Auditor of State the amount of taxes to be reimbursed from the state treasury.

**5703-3-18 Tangible Personal Property Tax; New Taxpayers.**

- (A) A person who engages in business in this state on or after the first day of January in any year shall, for that year, list his taxable personal property, except inventory, as to value, ownership, and taxing district as of the first day he engages in business. Inventory shall be similarly listed, except the value shall be the probable average value intended to be used in business from the first day of business until the first day of the next January.
- (B) The valuation of all property to be listed by a new taxpayer shall be calculated by multiplying the value or average value by a fraction whose numerator is the number of full months engaged in business during such first year and whose denominator is twelve.
- (C) A new taxpayer who has acquired personal property, other than inventory, need not list such property for the first year of business if he can prove to the assessor, under oath or by producing a copy of the return or assessment, that the same items of property have been listed or assessed for taxation for such year in this state.
- (D) A new taxpayer who acquires an on-going business may exclude from his tax return for the first year of business inventory transferred to him by the predecessor if he can prove to the assessor, under oath or by producing a copy of the return or assessment, that the predecessor has listed such inventory for such year. The exclusion is limited to the value of the inventory transferred or the predecessor's average inventory value associated with the inventory transferred, whichever is less.
- (E) Paragraphs (C) and (D) of this rule do not apply to personal property acquired in the ordinary course of business.

**This worksheet may be used by a new taxpayer who acquires an ongoing business to determine possible exclusions on inventory per 5703-3-18, paragraph D, on what inventory is reportable.**
